We welcome you to the second SUA Ultrasound Chronic Pain Workshop.

Following the success of last years workshop we have developed this workshop into a pure hands on day of imaging for ultrasound (uss) guided pain procedures.

Under the guidance of our expert faculty and within small groups you will spend the day practically learning a wide variety of chronic pain procedures using ultrasound.

You will have plenty of time to practise scanning techniques on live models and the opportunity to practise needling on our phantom.

The course is not only aimed at those that are learning uss guided techniques for the first time but also for those that wish to fine tune the skills that they have already acquired.

In order to maximise hands on time during the day we have developed an online library of lectures and resources that you will be given access to, to look over in your own time.

We will have a number of different ultrasound machines for you to use allowing you the opportunity to ‘road test’ them before considering purchase.

We will be including the following procedures in this years workshop:

**Cervical:**

Medial branch, root block, stellate ganglion

**Thoracic:**

Paravertebral & intercostal blocks

**Lumbar:**

Facet, medial branch, caudal, sacroiliac, piriformis

**Nerves:**

Ilioinguinal, iliohypogastric, suprascapular, Transversus abdominis Plane block, greater occipital
